*Estimated age

**Outbred, isolator-maintained

§Heterozygous (haired) animals are not immunodeficient. Call 1.800.522.7287 for pricing and availability.

Nomenclature CrI:NU(NCr)-*Foxn1*^{nu} **Origin** This immunodeficient nude mouse originated from NIH and was originally thought to be a BALB/c congenic. It was later determined that it was not inbred and is therefore maintained as an outbred. It is not associated with any stock or strain. The animal lacks a thymus, is unable to produce T cells, and is therefore immunodeficient. To Charles River from NCI in 2010. **Coat Color** Hairless, albino background. **Research Application** tumor biology and xenograft research
