

FACILITY OVERVIEW

Hollister

Charles River's Hollister, CA facility offers biosecurity, International Genetic Standardization (IGS), animal welfare, and model quality, ensuring animal models of superior health and genetic status so your research results are reliable and consistent.

Background

- Constructed in 1993
- Situated on 12 acres

Laboratories and Facilities

- 9 barrier rooms
- 40,200 square feet of production space
- 12,450 square feet of isolator space for VAF/Elite™ and Immunodeficient Model production
- Capacity for 300 isolators
- 4,000 square-foot surgical suite

Staff

- 85 employees
- Oversight team
- Animal welfare
- Biosecurity
- Veterinary professional services

Service Areas/Study Types

- Animal Models
 - Outbred rats
 - CD® IGS
 - Long-Evans (L/E)
 - Inbred mice
 - BALB/c
 - BALB/c-ELITE
 - C57BL/6
 - C57BL/6-ELITE
 - FVB
 - Outbred mice
 - CD-1®
 - CD1-ELITE

EVERY STEP OF THE WAY

Service Areas/Study Types (Continued)

- Immunodeficient Models
 - Inbred mice
 - BALB/c Nude
 - Outbred mice
 - Athymic Nude
 - CD-1® Nude
 - NU/NU Nude
 - Congenic mice
 - Fox Chase SCID® (CB17SCID)
 - Fox Chase SCID® Beige
 - NOD SCID
- Preconditioning Services
 - Surgical services
 - Vascular catheterization
 - Non-vascular catheterization
 - Soft tissue procedures
 - Neurological procedures
 - Cardiovascular procedures
 - Device implants
 - Surgical support
 - Supplemental services
 - Pre-ID™ services
 - Pre-screening services
 - Pre-dosing/Pre-injection Services
 - Aging and Feeding Studies
 - Biospecimens
- Additional Services
 - Genetically Engineered Models and Services (GEMS)*
 - Breeding & housing
 - Embryology
 - Genetic testing
