

FACILITY OVERVIEW

Stilwell, Kansas

The Stilwell, Kansas site performs general toxicology and specialized studies which include discovery *in vivo* PK, discovery toxicology, and efficacy pharmacology. The facility also supports safety pharmacology and targeted animal health programs.

Laboratories and Facilities

- 30 multispecies rooms
- 1 surgical suite
- 78,000 sq. ft.

Staff

- 112 employees, including:
 - 4 PhDs
 - 2 DVMs
 - 1 DABTs
 - 10 study directors

Service Areas/Study Types

- Toxicology
 - Discovery
 - General
 - Acute
 - Infusion
- Safety Pharmacology
 - Core battery and follow-up respiratory assessments
 - Core battery and follow-up CNS assessments
 - Core battery and follow-up cardiovascular assessments
 - Efficacy pharmacology

- Pharmacokinetics
 - High throughput PK screening
 - Pharmacokinetics (PK) and Toxicokinetics (TK)
- Specialty services
 - Targeted animal health
- Pathology
 - Histopathology
 - Clinical pathology

Compliance, Certifications, Accreditations and Professional Affiliations

- The Stilwell facility operates in compliance with the requirements of the following regulatory agencies or accredited organization:
 - OECD
 - FDA
 - USDA
 - EPA
 - AAALAC

Quality and Process Initiatives

- Excellent inspection history
- On-site IT support

Humane Care Initiative

Charles River is a worldwide leader in the humane care of laboratory animals. We work hand-in-hand with the scientific community to understand how living conditions, handling procedures and stress play an important role in the quality and efficiency of research.
