Ordering Instructions

Questions? askcharlesriver@crl.com www.criver.com/info/dx

If you are having trouble filling out, saving or sending this form, please make sure you have downloaded the latest version of Acrobat Reader, a free program available at adobe.com.

Please make sure you fill out the entire top portion of the form completely. Any missing information will result in a delay to your order. If you wish to pay by credit card, please provide a contact name and phone number in the spaces provided.

Once the form is completely filled out, simply click on "submit by email" and a pdf will be sent to us at crl_reagents@crl.com automatically. Or click "print form to fax", print only page 1 and send it to us at 978-658-7698. Once your order has been placed, you will receive an email with the order number, total cost with shipping charges and the anticipated shipping date for your order.

If you need your reagents by a certain date, please include this in the "ship date" field and mention it in your email or fax.

PLEASE NOTE: The normal turnaround time for serology reagents is one (1) week. We make all of the reagents in-house and in order to supply you with the latest expiration date possible, we do not keep large stocks on hand. Of course we do our very best to accommodate emergency rush orders, but please keep the two-week turnaround in mind when placing your order.

The reagents are shipped on Monday through Wednesday via overnight services with enough refrigerants to last 48 hours.

RETURNS: Unfortunately, Charles River CANNOT accept returns of reagents. We do our best to eliminate the possibility of errors when placing reagent orders. If an error should occur, please contact us to resolve any issues so that we can assist you with the disposal of materials and reordering of other reagents.
