

ANIMAL SAFETY CHECKLIST – SHIPMENTS TO RADS LABORATORY

Animal Welfare is important to Charles River. So, we strive to reduce the stress on your animals during transport. Since each one offers a unique link to the health history of your facility, you need to know that they will arrive safely to give you accurate health testing results. Let us help you protect the integrity of your research and keep your animals safe.

- Animals have been scheduled for delivery and Charles River Research Animal Diagnostic Services is aware that they are being shipped.
- Animals are able to move about cage/crate freely. No tails or feet have been caught in lids.
- Transgel® or other water source has been added and opened.
- Food has been provided.
- Crate is not overcrowded.
- Bedding has been provided.
- Animals are shipped in an IATA-compliant animal shipping container.
- Label clearly indicates the delivery place
- A shipper or courier with a temperature-controlled environment has been selected.

Thank you for helping us ensure that your animals are delivered safely. If you have any questions, or to schedule your animal submissions, please contact **Charles River** at askcharlesriver@crl.com.
