

Hollister/San Diego at-a-glance

With facilities located throughout North America, Charles River can provide continual research support, regardless of location. Our core programs, which include Biosecurity, International Genetic Standardization (IGS), Animal Welfare, and Model Quality, ensure animal models of superior health and genetic status so your research results are reliable and consistent. Through the hard work of our employees, the Hollister and San Diego facilities are able to offer you the best possible support for your research programs.

- 4,000 square-foot surgical suite
- AAALAC accredited

Staff

- 85 employees
- Oversight Team
 - Animal Welfare
 - Biosecurity
 - Veterinary Professional Services

Animal Models

- Inbred Rats
 - Lewis
- Outbred Rats
 - CD® IGS
 - Long-Evans (L/E)

Animal Models (continued)

- Inbred Mice
 - BALB/c
 - C57BL/6
 - C57BL/6-ELITE*
 - DBA/2
 - FVB
- Outbred Mice
 - CD-1®
 - CD1-ELITE
 - SKH1-ELITE*

* Bred in Hollister and/or San Diego facility

Immunodeficient Models

- Outbred Rats*
 - RNU Nude
- Inbred Mice
 - BALB/c Nude
- Outbred Mice
 - Athymic Nude*
 - CD-1® Nude*
 - NU/NU Nude*
 - SCID Hairless Outbred (SHO®)*
- Congenic
 - Fox Chase SCID® (CB17SCID)*
 - Fox Chase SCID® Beige*
 - NOD SCID

* Bred in Hollister and/or San Diego facility

Preconditioning Services

- Surgical Services
 - Vascular Catheterization
 - Non-vascular Catheterization
