

Charles River Pre-ID™ Services

Animal identification is a critical component of most research projects or studies, as it facilitates the proper tracking and management of data for each study animal. The ability, or lack thereof, to efficiently and accurately identify these animals can potentially make or break a study.

Charles River Pre-ID™ services offer multiple identification options, including Labstamp®, ear tag, microchip implant, ear notch and tattooing. Our skilled technicians perform all procedures in adherence to the highest standards in aseptic technique and animal welfare.

Ordering Information

Our customer service representatives strive to make the ordering and shipment process as easy as possible for you. As such, Pre-ID™ services can be added as part of your animal order. Simply select the method you require and provide Charles River with the identification codes you would like us to use.

We offer multiple ways for you to order research models that have been pre-identified, including:

- Phone: 1.800.LAB.RATS (1.800.522.7287)
- Fax: 1.800.922.7329
- Online: www.criver.com/shopping-cart
- Electronic Data Interchange (EDI): Contact us about a customized program for you

Benefits of Pre-ID™

- Reduced labor and supply cost associated with in-house identification
- Improved chain of custody and ownership
- Reduction in time needed to place animals on study

Mice identified using the Labstamp® method
