

## RESEARCH MODELS

# Charles River Pre-ID™ Services

### Benefits of Pre-ID™

- Reduced labor and supply cost associated with in-house identification
- Improved chain of custody and ownership
- Reduction in time needed to place animals on study

Animal identification is a critical component of most research projects or studies, as it facilitates the proper tracking and management of data for each study animal. The ability, or lack thereof, to efficiently and accurately identify these animals can potentially make or break a study.

Charles River Pre-ID™ services offer multiple identification options, including Labstamp®, ear tag, microchip implants, ear notch, and tattooing. Our skilled technicians perform all procedures in adherence to the highest standards in aseptic technique and animal welfare.

### Our Portfolio

Method*	Mouse	Rat	Guinea Pig	Gerbil	Hamster
Ear punch	•	•	•	•	•
Ear tag	•	•	•	•	•
Microchip (AVIDTRANS, BIOMEDTRNS, TROVAN-ID, and UID)	•	•	•	•	•

Tail marking	•	•			
Tattoo	•	•	•		

\* Not all options are available for every species/strain.

### Ordering Information

Our client relations representatives strive to make the ordering and shipment process as easy as possible for you. Pre-ID™ services can be added as part of your animal order. Select the method you require and provide us with the identification codes you would like to use. To place an order or get a quote, contact our Client Relations Department at 1-800-LABRATS (1-800-522-7287).
